

AFM500X

Automatic Flashing Module

The AFM500X is a dual-function automatic flashing module designed to help generators with low residual voltage build up voltage on startup.

Installers and service technicians can select automatic flashing using the generator's residual voltage, or an automated battery flash depending on the specific needs of the generator in question. The AFM500X is compatible with all of Power-Tronics Professional Series voltage regulators and accessories.

The AFM500X is designed for easy installation and a long service life. In addition to the rugged encapsulated design and unmatched technical support, the AFM500X has an industry-leading 2 year factory warranty! All Power-Tronics products are **PROUDLY MADE IN THE USA!**

Product Features:

- Automatic Flash or Battery Flash, user-selectable
- 5A Continuous rating, 5A fusing
- Compatible with 120-240V sensing voltage
- Compatible with 25-400Hz generators
- Contains a current limiting fuse on battery input
- Internal diode prevents connecting battery in reverse polarity
- Compatible with past or present Power-Tronics regulators and accessories
- Fully encapsulated design
- TWO YEAR factory warranty

For Over 25 Years:
Simple. Reliable. Affordable.
