

CFM12

Critical Flashing Module

The CFM12 is an automatic flashing module designed to force critical backup or auxiliary generators with low residual voltage build up voltage on startup.

Important and critical generator installations such as those in hospitals, prisons, schools, and nursing homes are expected to build voltage

regardless of any other conditions. The CFM12 contains an automatic battery charging system and onboard battery to force-flash these generators to guarantee reliable voltage buildup. The CFM12 is compatible with all of Power-Tronics Professional Series voltage regulators and accessories.

The CFM12 is designed for easy installation and a long service life, with easy battery maintenance. In addition to the rugged encapsulated design and unmatched technical support, the CFM12 has an industry-leading 2 year factory warranty! All Power-Tronics products are **PROUDLY MADE IN THE USA!**

Product Features:

- Automatic Battery Flash
- Onboard SLA battery
- 8A Continuous rating
- Compatible with 120-240V sensing voltage (specified at time of order)
- Compatible with 25-400Hz generators
- Battery indicator LED
- Internal diode prevents operation with the battery in reverse polarity
- Compatible with past or present Power-Tronics regulators and accessories
- Fully encapsulated design
- TWO YEAR factory warranty

For Over 25 Years:

Simple. Reliable. Affordable.
