

PC2000BF

Phase Control

The PC2000BF Phase Control is designed to replace rotary exciters, static power supplies, or directly rotor-feed a synchronous motor or magnetic clutch originally equipped with a static power supply. All PC2000 series phase controls are fitted with a PC500X phase control and remote wiring block to allow simple installation with a minimum of wiring.

The PC2000BF contains a phase control card, full rectifier section, fusing, and terminal blocks for quick and easy hookup, and fast

service or repair! The unique design is passively cooled, and oversized for reliable operation in even the most demanding installations.

The PC2000BF is designed for easy installation, setup, and service in the field. In addition to the rugged design, simple setup, and unmatched technical support, the PC2000BF proudly sports an industry-leading 2 year factory warranty! All Power-Tronics products are **PROUDLY MADE IN THE USA!**

Product Features:

- Full-Wave rectified
- 125V continuous output
- 210V forcing output
- 180A continuous rating, 200A fusing
- Passive cooling requires no forced air for rated burden
- Compatible with 50 or 60Hz electrical supplies
- Simple 4-wire hookup
- Field-serviceable
- Integrated field noise suppression
- On-board fuseblocks
- Space-saving design (18 x 24")
- Compatible with past or present Power-Tronics accessories
- TWO YEAR factory warranty

For Over 25 Years:

Simple. Reliable. Affordable.
