

SE2000AF

Static Exciter

The SE2000AF Static Exciter is designed to replace rotary exciters or directly rotor-feed a generator originally equipped with a static exciter. All SE2000 series static exciters are prewired for paralleling controls, making it an easy installation where the generator will be paralleled with a generator bus, or utility.

The SE2000AF contains a regulator, full rectifier section, automatic flashing module, fusing, and terminal blocks for quick and easy hookup, and fast service or repair! The unique design is passively cooled, and oversized for reliable operation in even the most demanding installations.

The SE2000AF is designed for easy installation, setup, and service in the field. In addition to the

rugged design, simple setup, and unmatched technical support, the SE2000AF proudly sports an industry-leading 2 year factory warranty! All Power-Tronics products are **PROUDLY MADE IN THE USA!**

Product Features:

- Half-Wave rectified
- 63V continuous output
- 105V forcing output
- 180A continuous rating, 200A fusing
- Passive cooling requires no forced air for rated burden
- Compatible with 50 or 60Hz generators
- Simple 4-wire hookup
- Integrated paralleling provisions
- Field-serviceable
- Integrated field noise suppression
- On-board fuseblocks
- Space-saving design (12 x 24")
- Compatible with past or present Power-Tronics accessories
- TWO YEAR factory warranty

For Over 25 Years:

Simple. Reliable. Affordable.
