

SEM250A

Professional Series Static Exciter Module

The SEM250A Static Exciter Module is the latest upgrade to Power-Tronics' line of static exciter modules and replaces the long running SE350 model.

Over 30 years of field service and refinement has resulted in the SEM250A proving to be an extremely durable and long lived

design! If you have an existing installation, the SEM250A is backwards compatible with all of Power-Tronics previous models and accessories and is a direct replacement for the SE350 Static Exciter Module!

The SEM250A is designed for easy installation, setup, and service in the field. In addition to the rugged design, simple setup, and unmatched technical support, the SEM250A proudly offers an industry-leading 3 year factory warranty for that extra peace of mind.

Product Features:

- Half-Wave rectified
- 63V continuous output
- 105V forcing output
- 25A continuous rating
- Passive cooling requires no forced air for rated burden
- Compatible with 25-400Hz generators
- Mounts on top of UVR or XR series regulator for compact installation
- Field-serviceable Easily upgraded to 50A capacity by adding a second SEM250A in parallel
- **Proudly Made in the USA** to the highest standards using the highest quality components
