

SEM250B

Professional Series Static Exciter Module

The SEM250B Static Exciter Module is the latest upgrade to Power-Tronics' line of static exciter modules and replaces the long running SE450 model.

Over 30 years of field service and refinement has resulted in the SEM250B proving to be an extremely durable and long-lived design! If you have an existing installation, the SEM250B is backwards

compatible with all of Power-Tronics previous models and accessories and is a direct replacement for the SE450 Static Exciter Module!

The SEM250B is designed for easy installation, setup, and service in the field. In addition to the rugged design, simple setup, and unmatched technical support, the SEM250B proudly carries an industry-leading 3 year factory warranty for that extra peace of mind.

Product Features:

- Full-Wave rectified
- 125V continuous output
- 210V forcing output
- 25A continuous rating, 30A forcing
- Passive cooling requires no forced air for rated burden
- Compatible with 25-400Hz generators
- Mounts on top of UVR or XR series voltage regulators
- Field-serviceable
- Easily upgraded to a 50A capacity by adding another SEM250B in parallel
- Compatible with past or present Power-Tronics accessories
- **Proudly Made in the USA** to the highest standards using the highest quality components
