

XR5C

Specialty Series

Universal Voltage Regulator

The XR5C Universal Voltage Regulator is a specialty voltage regulator designed for legacy installations, or for special applications that require the use of a manual stability adjustment.

Legacy installations with previous model Power-Tronics regulators can upgrade to the XR5C without adjusting any droop settings or performing any other tuning on their system! The XR5C offers an easy way to upgrade older systems and is compatible with all of Power-Tronics optional accessories and add on modules.

The XR5C is designed for easy installation, easy setup, and easy service in the field. In addition to the rugged design, precise regulation, and unmatched technical support, the XR5C proudly offers an industry-leading 3-year factory warranty for that extra peace of mind for both installer and end user.

Product Features:

- Universal Design, Full-Wave or Half-Wave rectified, user-selectable
- 5A Continuous rating, 5A fusing
- 1% Regulation accuracy NL-FL
- <.5% Thermal drift 0°C – 60°C
- User-selectable frequency following setpoint (45/55Hz)
- Compatible with 50 or 60Hz generators
- Easily paralleled using reactive-droop compensation
- Simple setup and adjustment procedure
- Compatible with past or present Power-Tronics accessories
- Repairable circuit card
- **Proudly Made in the USA** to the highest standards using the highest quality components
